

Pearson Correlation
7
as CalciumScore increases Age incr

Pearson Correlation
30
as HDL increases Age increases

Pearson Correlation
-33
as LDL increases Age decreases

Pearson Correlation
-15
as Smoke increases Age decreases

CalciumScore

Pearson Correlation

7

as Age increases CalciumScore incr

CalciumScore

Pearson Correlation

3

as HDL increases CalciumScore incr

CalciumScore

Pearson Correlation

-35

as LDL increases CalciumScore decr

CalciumScore

Pearson Correlation

25

as Smoke increases CalciumScore in

Pearson Correlation

**-19**

as Age increases TG decreases

Pearson Correlation

**-16**

as CalciumScore increases TG decreases

Pearson Correlation

**-51**

as HDL increases TG decreases

Pearson Correlation

**48**

as LDL increases TG increases

Pearson Correlation
<b>-12</b>
as <b>Smoke</b> increases <b>TG</b> decreases

Pearson Correlation
30
as Age increases HDL increases

Pearson Correlation
3
as CalciumScore increases HDL increases

Pearson Correlation
-32
as LDL increases HDL decreases

Pearson Correlation
1
as Smoke increases HDL increases

Pearson Correlation
<b>-33</b>
as <b>Age</b> increases LDL <b>decreases</b>

Pearson Correlation
<b>-35</b>
as <b>CalciumScore</b> increases LDL <b>decreases</b>

Pearson Correlation
<b>-32</b>
as <b>HDL</b> increases LDL <b>decreases</b>

Pearson Correlation
<b>0</b>
as <b>Smoke</b> increases LDL <b>decreases</b>

Pearson Correlation
<b>-15</b>
as <b>Age</b> increases <b>Smoke</b> decreases

Pearson Correlation
<b>25</b>
as <b>CalciumScore</b> increases <b>Smoke</b> increases

Pearson Correlation
<b>1</b>
as <b>HDL</b> increases <b>Smoke</b> increases

Pearson Correlation
<b>0</b>
as <b>LDL</b> increases <b>Smoke</b> decreases
